Research profile

PhD candidate in Economics and Quantitative Methods with research interests in applied microeconomics, household finance, and public economics. Experienced in working with large-scale microdata (ECB HFCS, Crunchbase) and advanced econometric methods to study financial leverage, asset distribution, and economic mobility across European countries.

Education

2023–2026	PhD in Economics and Quantitative Methods
University of Genoa	Genoa, Italy (ABD)
2018–2021	MSc in Economics and Political Science
University of Milan	Milan, Italy
2015–2018	BSc in International Science, Development and Cooperation
University of Turin	Turin, Italy
2017–2018	Exchange Program
University of Hamburg	Hamburg, Germany

Professional experience

2023–2026	PhD Researcher / Quantitative Analyst
University of Genoa	Genoa, Italy
• Conduct quantitative analyses on large-scale household finance datasets using econometric and statistical techniques. • Clean, manage, and process complex microdata using Stata, R, and Python. • Develop empirical models to analyse financial behaviour, leverage, and investment decisions. • Produce analytical reports and presentations for technical and non-technical audiences.	
2024–2025	Visiting Researcher
Zhejiang International Studies University	Hangzhou, China
• Collaborated on international projects involving household finance, sustainability, and private capital allocation. • Performed data cleaning, econometric analysis, and empirical reporting using Stata, R, and Python. • Worked in an international research environment with cross-functional collaboration and independent project responsibilities.	
2022–2022	Mutual Funds Analyst
Infosys BPM	Dublin, Ireland
• Analysed investment fund prospectuses in German and English to extract and validate financial information for client databases. • Processed and maintained high-quality financial data under strict quality and accuracy standards. • Supported onboarding and training activities for new team members.	
2021–2022	Application Development Analyst
Accenture Technology	Rome, Italy
• Worked on applications supporting large-scale data workflows and storage systems. • Used SQL, Scala, Spark, Hadoop, Oracle, and Unix-based environments in enterprise data infrastructures. • Contributed to debugging, optimisation, and integration of data-processing applications.	

Working papers

- *Inherited Housing and Household Investment: Evidence from Germany and Spain* ([Job Market Paper](#)), 2026.
- *What Households Borrow For: The Effects of Debt Composition on Business and Income Outcomes*, 2026.
- *From Private Wealth to Patient Capital: Family Offices in Entrepreneurial Finance*, 2026 (with Emma Li, Haoyong Zhou).

Conference presentations

- HEC Liège Young Researchers Conference in Economics (HYRCE), Liège, Belgium (16–17 Apr 2026): “Inherited Housing, Collateral, and Household Wealth Accumulation”.

Technical skills

Programming: Stata; R; Python; SQL; Scala

Econometrics: Panel data; causal inference; time series analysis; statistical modelling; policy evaluation

Data technologies: Spark; Hadoop; Oracle; Impala; Kudu

AI-assisted analytics: Generative AI tools for research support, coding assistance, workflow automation, and data exploration

Tools: Git/GitHub; Linux/Unix; Bloomberg Terminal; LaTeX; Microsoft Office

Additional training

- Time Series Models for Macroeconomic Analysis, Barcelona School of Economics (Jun 2024).
- Macroeconomic Forecasting and Analysis in the Machine Learning Era, Italian Econometric Association (Jul 2023).
- Explainable Machine Learning, Universidad Politécnica de Madrid (Jun 2023).
- Empirical Industrial Organisation, University of East Anglia (Feb–Mar 2023).
- Industry Training – Data Analyst Junior, Biogen Life and Mind Science School (Sep–Nov 2021).
- Blockchain – Linking Economics, Technology and Law, University of Zurich (Jul 2020).

Languages

Italian (native); English (C2); German (B2); French (B1)
